

Welcome to... The London Sash Window Company

Here at The London Sash Window Company we specialise in restoring and replacing traditional wooden windows.

Our business is all about making your windows work more efficiently and returning them to their former glory. So, whether you are looking to overhaul and draught proof your windows or to completely replace them, we will provide you with a full and personal service to help you achieve exactly what you want.

"The London Sash Window Company provided me with a truly professional service from beginning to end. I would highly recommend their services."

Jan Van Tol, Hampstead

Our Services

Overhaul, draught proofing and new window furniture

This service gives your existing traditional windows a new lease of life as we sympathetically overhaul all the working elements of the window:

- All sash cords replaced
- The counter weight system rebalanced
- New window furniture and security locks added
- Draught proofing installed

Our draught proofing procedure eliminates draughts, while not impacting on the traditional look of the windows. We can also carry out any other remedial work such as re-glazing and repairing rotten wood or perished putty.

Replacement sashes

Here we replace the moving parts of the window (sashes), which are custom-made and fully double-glazed. They not only fit with the period detail of your property, they also offer you all the benefits of modern double-glazing:

- Existing sashes replaced with our custom-made double-glazed sashes
- Sashes decorated
- The interior workings of the window completely overhauled, new window furniture added and draught proofing installed
- The old window frame remains in place

Full window replacement

With this option, we replace absolutely everything and install brand new windows. We recreate the original beauty of traditional windows but use modern glazing techniques and craftsmanship so that your windows stand up to the demands of 21st century living:

- Every part of the window replaced like for like
- New boxframe, sashes, architrave and nosing installed to match the period detail of your property
- Windows fully double-glazed and draught proofed to meet building regulations
- Windows decorated

Our products

Traditional Sash Windows

Our wooden sash windows are made in the UK using traditional construction methods, but have the modern benefit of being double-glazed.

Preserving the look of traditional windows is very important to us and that is why we recreate original features and details that are in keeping with the period of your property. All our windows are bespoke and crafted using the timber, glass, paint finish and window furniture of your choice.

Our objective is to provide a window that is authentic but has the comforts of modern glazing to suit our 21st century lifestyles.

Traditional Window Furniture

We offer a range of stylish, quality window furniture for single- and double-glazed sash windows. These include fasteners, sash lifts and D handles that come in a selection of finishes to match your chosen interior design scheme. We also offer insurance rated security locks to match.

"The London Sash Window Company was able to advise us on what would work best for our Victorian house and source the right timber, glass and mouldings for the period of our property. We now have new windows that are finished perfectly but look as if they have always been there - we're thrilled."

Darlow, Bayswater

Secondary Glazing

Our secondary glazing will provide you with maximum sound insulation but, importantly has very little impact on the look of your windows.

What is secondary glazing?

Secondary glazing is a fully independent frame fitted on the room side of an existing window to form a double window or 'double glazing'.

We use a system that has been tried and tested for over 40 years. What's more, our secondary glazing can be made with wooden frames and painted to suit your chosen interior styling.

Why use secondary glazing?

While the main benefit is to reduce noise pollution to an absolute minimum, secondary glazing will also help you conserve energy and improve your home's security. As it does not affect the character of your building, it satisfies Heritage and Conservation bodies if you live in a listed building.

"Installing secondary glazing has been a revelation. It has made a huge difference to the noise levels in our bedrooms and while I was initially concerned about how they would look against our traditional windows, I am very happy with the end result."

Toby, Clapham

Shutters

Our shutters are made-to-measure and can be perfectly incorporated into a traditional or modern home.

We have a wide selection of finishes, so if you need a particular colour or wood stain, sandblasting, made-to-measure shutter frames or tilt rods, we can provide you with the perfect shutters that will look stunning in your home. What's more, our shutters can be adjusted manually or automatically with one of our innovative remote control options.

"We are very pleased with the final result. The fitter was highly professional and hard working and a credit to The London Sash Window Company. Thank you for dealing with our anxieties so professionally."

M Lyons, Walton-on-Thames

Doors

In addition to our traditional window services, we can restore and replace traditional French doors as well as install the more modern and increasingly popular bi-fold doors.

French doors

We offer a restoration service for traditional French doors and can repair any damage to the frames and furniture, re-glaze them with toughened glass and give them a full overhaul so that they fit and lock properly.

If the damage to your doors is extensive, we can replace them with our bespoke French doors, that are made with regulation toughened glass and wooden frames.

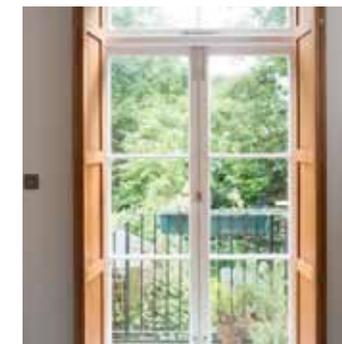

Bi-fold doors

Bi-fold doors have become increasingly popular as they work so well with our modern way of living – seamlessly opening up our interiors to the outside world.

Our bi-fold doors are beautifully crafted wooden doors that can be custom-made to match the mouldings and furniture of your existing sash windows..

"Exceptional work. The fitter did a detailed assessment of our French doors, noticed cracks, rotten areas and tended to each repair. His attitude and work ethic were exceptional - 12 hour days and the finished result looks good as new."
